#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. This office action is in response to the amendment and remarks filed on 10/28/03. Claim 1 has been amended. Thus, claims 1, 3, 4 and 11-35 are pending and examined.
2. The text of those sections of Title 35, U. S. Code not included in this action can be found in a prior Office action.

#### ***Claim Rejections - 35 USC § 112, 1<sup>st</sup> paragraph maintained***

3. Rejection of Claims 1, 4, 11-15, 19-25 and 30-35 under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for treating oral mucositis with IL-11 in a topical formulation, does not reasonably provide enablement for a method for treating all mucositis with IL-11 in topical formulations is maintained for is maintained for reasons of record of the Office Action of 7/30/2003. Applicant's arguments, filed 10/28/03, with respect to rejection of claims 1, 4, 11-15, 19-25 and 30-35 has been considered fully but is not persuasive. Applicant contends that one reasonably skilled in the art could make or use the invention from disclosures in the application coupled with information known in the art. However, the art accepted definition for "topical formulations" are directed to those formulations directly applied to skin or for external application (see U. S. Patent No: 6, 190, 691, Column 43-44) and contradicts Applicants' definition of "topical" (see specification page 8, lines 25-27). Thus, the information known in the art would direct the application IL-11 formulations of the instant invention for direct application (e.g: skin) compared to the disclosure, which contemplates other modes of administration including infant formula (claim 15) and formulations comprising enteric coating (claim 34). Therefore, it is unclear how the

Art Unit: 1647

administration of a topical formulation will be able to treat gastrointestinal mucositis. Since no guidance has been provided with respect to how a topically administered formulations would reach the gastrointestinal tract to treat mucositis, it would require an undue amount of experimentation for one of skilled in the art to practice the claimed invention.

Given the breadth of claims 1, 4, 11-15, 19-25 and 30-35 in light of the unpredictability of the art as determined by the lack of working examples, the level of skill of the artisan, and the lack of guidance provided in the instant specification and the prior art of record, it would require undue experimentation for one of ordinary skill in the art to make and use the claimed invention to treat gastrointestinal mucositis using a topical formulation containing IL-11.

4. Claims 3, 16-18 and 26-29 are allowable over prior art.
